

FCC with NAB petition 04-160 is trying to stop my server from providing Instant traffic & weather. I want to voice mu opposition to this proposed new regulation. I listen to XM radio because often in rural area's I can not receive many radio stations. The Instant Fraffic & Weather site helps me greatly. I travel through rural Texas, Louisiana, and Arkansas. While I am hours away from a larger city, I can listen to the weather ahead and find out about traffic. Please do not mess with this function.
